Gig Harbor, WA: Harbor WildWatch is hosting their First Annual Benefit Dinner on Saturday, October 10 from 6-9pm at The Club @ the Boatyard on Harborview Drive.

Since 2004, Harbor WildWatch has delivered fun and innovative educational programs to children and adults in the greater Gig Harbor and Key Peninsula communities. From science workshops in local classrooms to family-friendly beach walks along nearby shores, Harbor WildWatch has inspired stewardship to over 130,000 residents and visitors in their eleven-year history. By attending their first annual benefit dinner on October 10, you can show your support for environmental education in our community.

“This will surely be a night to remember in downtown Gig Harbor thanks to our amazing local partners,” said Executive Director Lindsey Johnson. Guests will enjoy fresh local food from Brix 25 and Taylor Shellfish Farms, beverages from Heritage Distilling Company and Henry Earl Estates, and entertainment from local harpist Moriah Rees. The evening will conclude with a riveting presentation from local professor, researcher and Gig Harbor resident, Michael Behrens, PhD.

Limited seating is available for this 21+ event, with tickets at $100 per person or $800 per table. Tickets can be purchased online at http://www.harborwildwatch.org/programs/private-programs/tickets/, or you may also pay in-person by stopping by the Harbor WildWatch office at the Historic Skansie House during Visitor Center hours (Thursday-Saturday from 10-4pm). Cash, check and all major credit cards accepted. All proceeds will directly benefit classroom and outdoor education programs for local students in 2016.

Harbor WildWatch is a 501(c)(3) non-profit environmental education organization based in Gig Harbor, WA. Founded in 2004, their mission is to inspire stewardship for Puget Sound by providing learning opportunities about the environment to the people in the local community. Through more than 500 fun and interactive programs each year, Harbor WildWatch hopes to inform residents and visitors about local marine life and elicit their involvement in preserving our natural resources.
